Bird Report

Cicadabird

Coracina tenuirostris (CAMPEPHAGIDAE)

1 July 1981 - 30 June 2013

Scope of Records - All surveys except Garden Bird Survey

Conditions for use

These data and copyright and other intellectual property rights in these data are and shall remain the property of Canberra Ornithologists Group (COG). COG must be acknowledged in any report, document or publication in which these data are used. These data are provided with the following statement as to the quality, which must accompany these data in any report, document or publication in which these data are used.

These data were collected by amateur bird watchers using various survey methods. Note that on some occasions more than one person may have recorded bird sightings on the same day.

See Data Quality for a more complete description of the quality of these data.

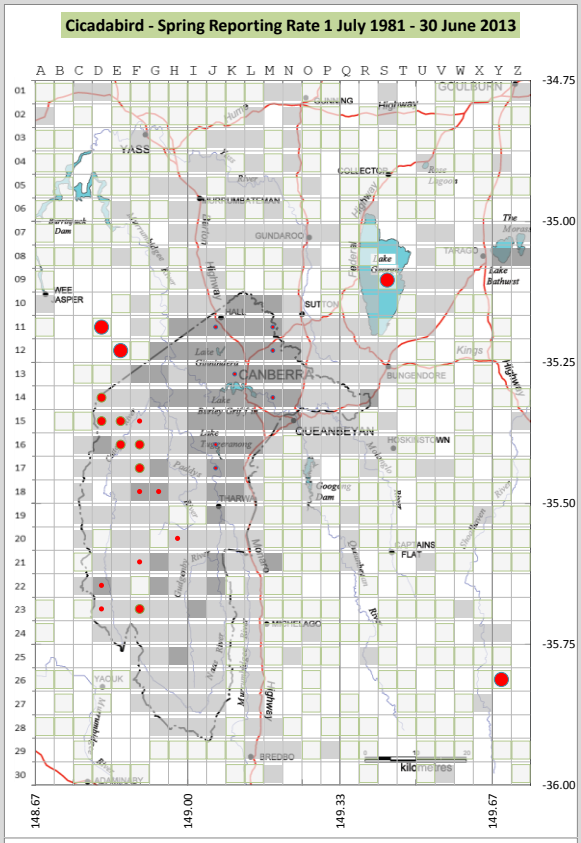
Data collected for the ACT Atlas (1 Sep 1986 to 31 Aug 1989 - Year ending 1987-1990) is included. The number of birds seen was not recorded for these data.

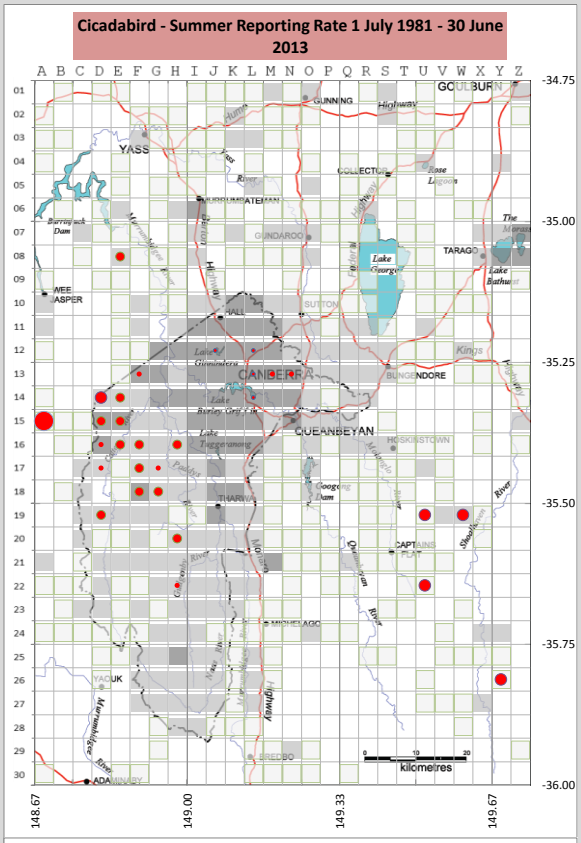
Contents

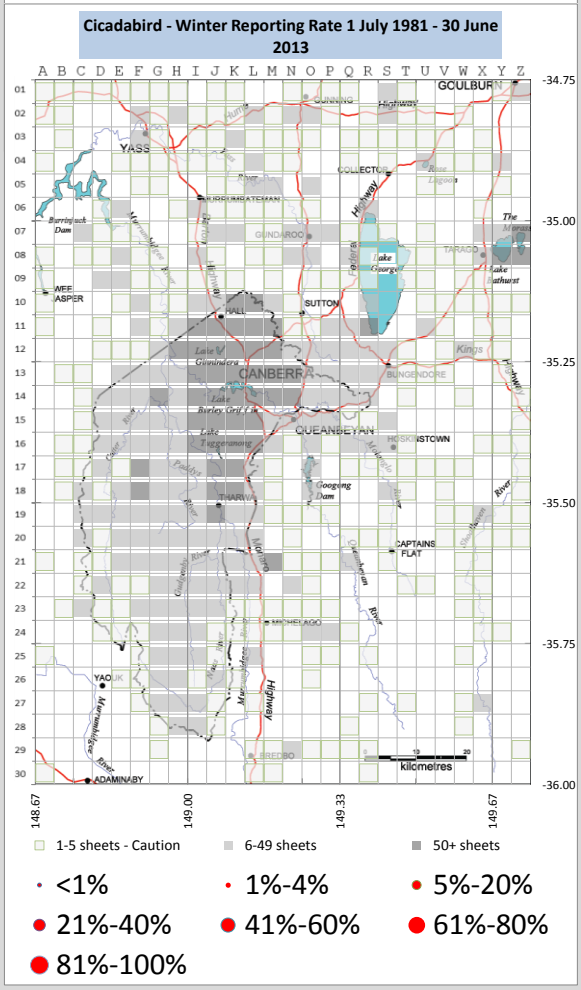
		Contents
Reporting Rate	**1**	Seasonal reporting rate
	2	Reporting Rate by year (ending 30 June) , month and season
Records	**3**	Earliest/Latest observations
	4	Number of records by year, month and season
Breeding	**5**	Breeding by month - 1 July 1981 - 30 June 2013
	6	Breeding by Year (ending 30 June)
Abundance	**7**	Abundance by bird year, month and season
Gridcells	**8**	Grid cells - number with records of the species
Frequency	**9**	Sites and Frequency(site)
Summary	**10**	Summary Statistics
Observations	**11**	Observers and Data Sheets - number by year, month and season

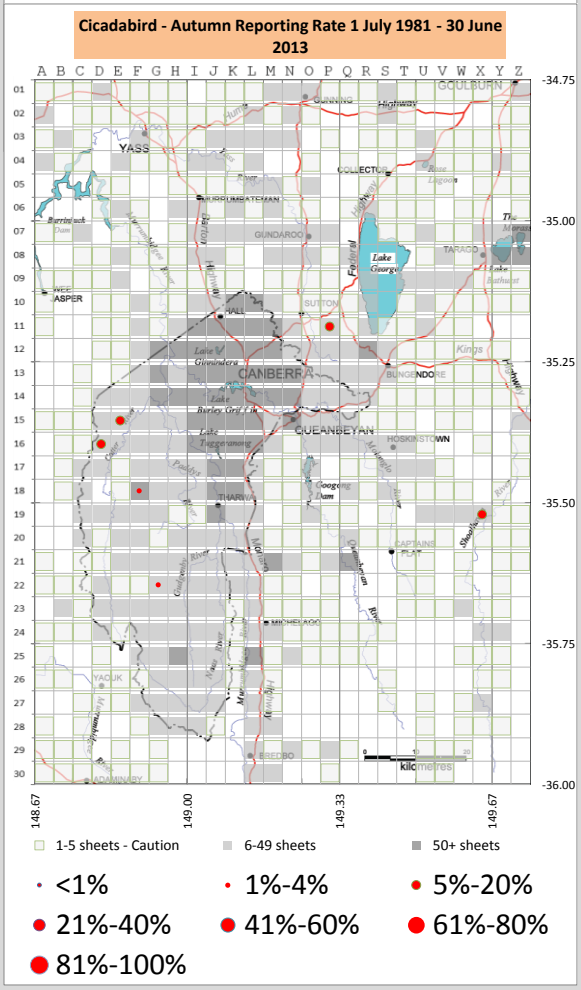
Cicadabird

Seasonal reporting rate









Cicadabird 2

Reporting Rate by year (ending 30 June) , month and season

The percentage of sheets that report the species. It is the number of sheets reporting the species divided by the total number of sheets in the period.

Abundance by bird year, month and season

The average number of birds of this species recorded per datasheet. It is the sum of the number observed divided by total number of datasheets in the period.
A Datasheet, or sheet, is the list of species seen at a location using a defined methodology or incidental observation. For the Garden Bird Survey, the observations for one observer for one week is considered a datasheet.

Data collected for the ACT Atlas (1 Sep 1986 to 31 Aug 1989 - Year ending 1987-1990) is included. The number of birds seen was not recorded for these data.

Cicadabird and all species

Sites and Frequency(site)

A site is a small area in which observations are made. In some cases, the observations may be repeated at the same site, such as the Garden Bird Survey. A site is identified by having the same latitude and longitude.
Frequency (site) is the percentage of sites where the species is reported. It is the number of sites where the species is reported divided by the total number of sites with reports in the period.

Observations

Observers and Data Sheets - number by year, month and season

These data include all data sheets and records for all species

The number of sightings is a count of the number of individual records. Ten species on a data sheet is 10 sightings, the same 10 species recorded on two data sheets is 20 sightings.
