italics = cited in Annual Bird Report (ABR). *Underlined italics* refer to null record references (or irrelevancies) in ABRs.

bold = Rarities endorsed by Rarities Panel and listed in Rarities Panel News or Endorsed lists.

underline = referred to only peripherally, anecdotally or in a historical context (for example in columns, book reviews, President's reports, commentaries etc); or when referring to null records (or irrelevancies) in Annual Bird Reports.

Species mentioned in references are not included.

References to (species included on) the "List of Unusual Birds of the Canberra Region" are not included.

Species are listed in taxonomic order (Christidis and Boles 1994) under family headings, with the common name in bold font. Species that are included in the Christidis and Boles list but for which indexations only refer to columnists or book review entries and the like are underlined. Where a reference refers to a non-Australian species (ie not included in the Christidis and Boles main list, or listed only in their Supplementary List) the species is listed at the end of the appropriate family listing and is not in bold font. Such entries are generally species mentioned in Columnist's writings,

book reviews and the like, but also include some escaped aviary birds.
