# Canberra Ornithologists Group Survey Grid

Australian Capital Territory Area

15 Kilometres

SCALE 1:120,000 on A1  
Projection: WGS 84 (Zone 55)

The COG grid is based on a 2.5 minute grid covering the ACT and immediate area (see below - 1:100,000 topographic map references in orange). The grid is referenced by 26 columns (labelled A to Z) and 30 rows (labelled 1 to 30). To give a grid reference according to the COG grid you must provide the alpha-numeric combination in the order of Column then Row. For example, the locality of Royalla can be referenced on the COG grid by the Column 'L' and Row '19'. Hence, Royalla occurs in Grid Cell 'L19'.

Map produced by Peter Cowper for Canberra Ornithologists Group (COG). This map is not accurate for navigation purposes and is prepared for information only concerning the COG Grid. This map is not to be sold.
