

# Species List

This list includes all species recorded in the Garden Bird Survey, and the statistics for each species. Note that not all records of unusual birds have been able to be appraised or endorsed by COG's Rarities Panel.

The birds are presented in sequence according to the number of records for each species.

The contents of each column in the table are:

Records:	Number of records for each species
Sites:	Number of sites where the species was recorded
Years:	Number of years in which the species was recorded
A (Abundance):	The number of individuals per observer week;
F (Frequency):	The percentage of sites at which a species was recorded;
W (Weeks):	The number of weeks within a year in which a species was recorded;
R (Reporting Rate):	The percentage of observer weeks in which a species was recorded,
G (Group Size):	The number of individuals per observation, i.e. average group size.
U	on COG's Unusual Birds List (that is fewer than 10 endorsed records in the previous 25 years).
E	probable escapee (not included on the Unusual Birds List).

Numbers of Records, Sites and Years for each species are best considered in relation to the total number of Charts, Sites and Years of the Survey.

**Number of Charts: 1707**

**Number of Sites: 356**

**Number of Years: 27**
