

Golden Whistler. Mulligans Flat Nature Reserve.  
Cedric Bear, 2022

## Birds of the ACT

Over 250 species of birds have been recorded in the Australian Capital Territory and its forests, woodlands, rural landscapes, lakes and ponds offer many places to see beautiful and interesting birds. Suburban areas of Canberra with mature planted trees also host a wide variety of birds.

Seasonal changes bring migratory birds to breed in the woodlands and mountain forests, and to congregate in our local wetlands, including the well-known Jerrabomberra Wetlands.

Mulligans Flat is home to woodland species, while beyond the Murrumbidgee River, itself an important corridor for bird movements, are Namadgi National Park and Tidbinbilla Nature Reserve with their own rich birdlife.

## About Canberra Birds

From small beginnings in 1964 the Canberra Ornithologists Group, now known as Canberra Birds, has grown into an effective and influential organisation that conducts surveys, supports research and actively puts its case for bird conservation to government and other organisations.

We also offer a wide range of activities, services and resources to our members, along with opportunities to get involved in a variety of citizen science projects.

Great Egret. Jerrabomberra Wetlands Nature Reserve. D. and R. Ralph, 2022

## Canberra Birds activities

Go to [www.canberrabirds.org.au](http://www.canberrabirds.org.au) for more information about our activities, including:

### Guided walks and trips

- Wednesday Walks and Saturday or Sunday outings – suitable for beginners as well as the more experienced
- Overnight trips including the popular pelagic ocean trips

### Monthly meetings

- **General meeting** – 2nd Wednesday of the month at 7:30 pm and including interesting presentations
- **Coffee and Chat at the Gardens** – 2nd Tuesday of the month at 9:30 am. Australian National Botanic Gardens café. All welcome

### Regular publications

- Monthly Gang-gang newsletter
- Periodic Canberra Bird Notes journal

### Email Chatline
