MURRUMBIDGEE RIVER CORRIDOR BIRD SURVEY FINAL REPORT – NOVEMBER 1986

SUPPLEMENTARY VOLUME

Canberra Ornithologists Group

NCDC Brief No.EL 16/85
No. of copies: 3
Copy 1 : NCDC
Copies 2-3 : Retained by contractor

INTRODUCTION

This volume contains the data on which the main volume of this report is based. It consists of three sections which are described below.

Section 1 contains data gathered from the 18 survey sites which were surveyed on a regular basis. The following abbreviations have been used:

ABV Average number of birds in vegetated habitats per visit (birds/hectare)
ABR Average number of birds in riverine habitats per visit (birds/site)
ABVR Average number of birds in vegetated and riverine habitats combined (birds/site)
RV The percentage of visits on which the species was recorded in vegetated habitats
RR The percentage of visits on which the species was recorded in riverine habitats
RVR The percentage of visits on which the species was recorded in vegetated and riverine habitats combined
IC The percentage of visits on which the species was recorded in anywhere in the inner corridor

Section 2 contains breeding data analysed by date. The number of sites at which breeding activity, probable and confirmed, is given for each species.

Section 3 shows the number of sites at which each species was recorded on each date. The average number of sites at which each species was recorded per survey and the total number of surveys each was recorded are also shown.

1. SITE DATA
